996 + 991 Bull Cycle

Trend, Hedge, Swing Trading

MDV 1 and MAV1 Trading Performance Analysis

This performance data sheet evaluates three trading strategies using both the 996 and 991 model price predictions, starting in 2022 at the beginning of the bull market. This analysis simulated $100,000 starting capital, with 1x leverage, closes all trades at $120,000, and excludes all fees, with the exception of the hedging strategy outlined below.
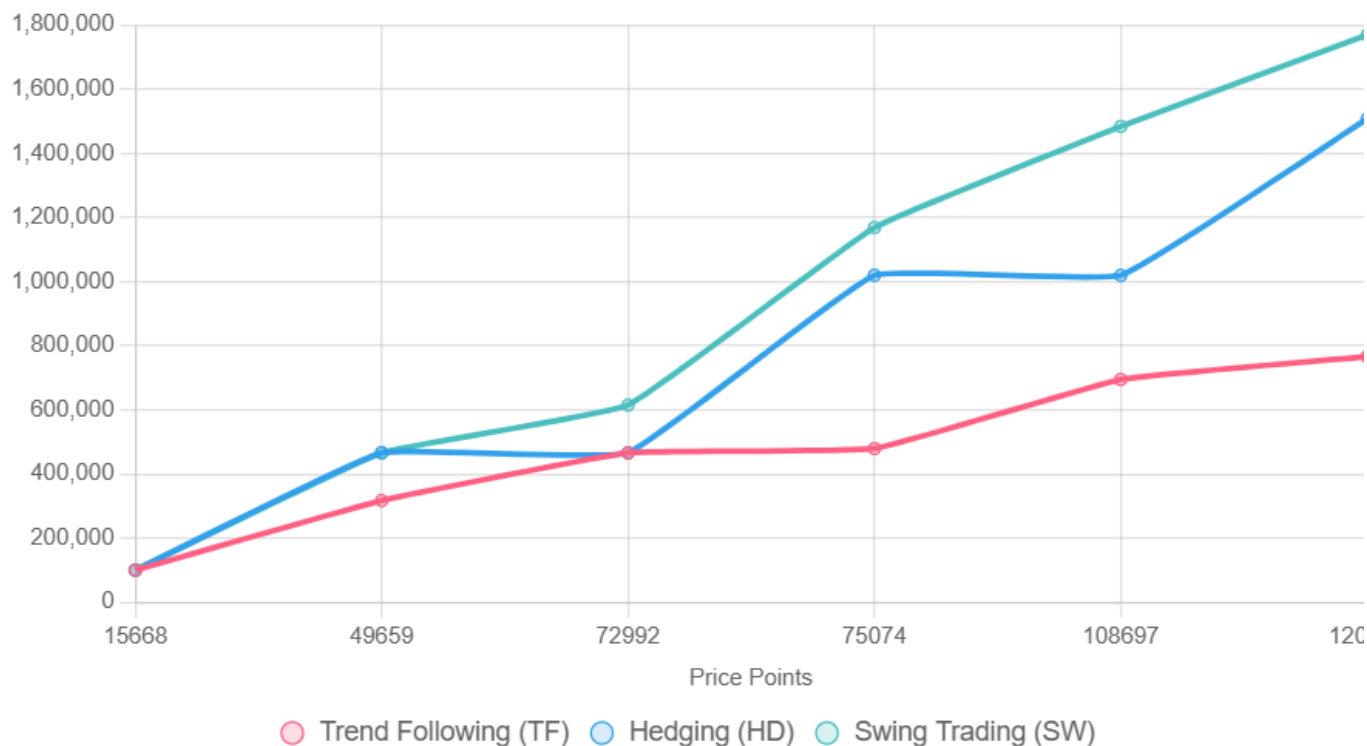

Model Price Predictions

996 Trades	991 Trades	Dates
15668 (Long)		Nov 2022
	72992 (Short)	Mar 2024
49659 (Long)		Aug 2024
	108697 (Short)	Jan 2025
75074 (Long)		Apr 2025
	120000 (close for model)	

Strategy Descriptions and Returns

- Trend Following (TF): Captures the main bull trend with a single long from 15668 to 120000. Total % Gain: 665.79%, Final Capital: $765,794.

- The Hedging (HD) strategy longs the bull market, using equal-sized short positions at 72992 to 49659 and 108697 to 75074 to nullify volatility in these segments, achieving $1,507,459. A 20% gain reduction is applied to the final long trade which accounts for costs such as margin interest, borrowing fees, or opportunity costs associated with maintaining short positions

- Swing Trading (SW): Trades all bull segments: long 15668 to 72992, short 72992 to 49659, long 49659 to 108697, short 108697 to 75074, long 75074 to 120000. Final Capital: $1,768,830.

Visualization: Capital Growth by Strategy

Percentage Gains

Trend Following	665.79 %
Hedging	1407.46 %
Swing Trading	1668.83 %

Strategy Summary
